## **THE GOLD STANDARD IN BULL EVALUATION**

Setting the industry standard for evaluated bulls, the MCA/MSU Bull Evaluation Program follows the Guidelines for Uniform Beef Improvement Programs published by the Beef Improvement Federation (BIF). The BIF standardizes data collection and reporting methods, and creates greater awareness, acceptance, and usage of beef cattle performance information. The membership of BIF consists of progressive cattle producers; provincial, state, and national beef cattle improvement associations; breed associations; and AI organizations.

## **EVALUATION DIET**

Following BIF guidelines, the official evaluation period is conducted for 112 days and the ration is scientifically designed to provide levels of energy and protein to allow for expression of genetic differences in lean growth among bulls. The evaluation diet was balanced to contain 43% corn silage, 28% corn, 23% hay/haylage, and 6% supplement on a dry matter (DM) basis. Average nutrient content on a DM-basis was 12.5% crude protein and 0.52 Mcal NE<sub>g</sub>/lb. In accordance with BIF guidelines, bulls are given an increased percentage of dietary forage for 5 weeks post-evaluation, along with daily exercise, to further prepare them for the breeding season and optimize reproductive performance.

## **ONLY BULLS PASSING OUR RIGID QUALIFICATIONS SELL**

- All bulls tested negative for BVD-PI and bTB.
- All bulls are non-carriers of lethal genetic defects, as identified by their breed association pedigree or confirmed by genetic testing, for which there is a DNA test available. These defects include: Arthrogryposis Multiplex (AM), Neuropathic Hydrocephalus (NH), Contractural Arachnodactyly (CA), Osteopetrosis (OS), Tibial Hemimelia (TH), and Pulmonary Hypoplasia with Anasarca (PHA).
- Bulls were measured using ultrasound for rump fat, rib fat, ribeye area, and intramuscular fat.
- All sale bulls have passed disposition and structural soundness screening.
- All sale bulls achieved a minimum average daily gain of 2.80 lb during the 112-day evaluation.
- All sale bulls passed breeding soundness requirements (see BSE section).

EPDs and percentiles are current as of Feb. 28, 2017. The percentile rank is the top percentile ranking of that EPD within the bull's respective breed (*i.e.* 20% = top 20% of breed).

Many of the sale bulls have had genomic (DNA) analysis performed to further increase the accuracy and reliability of their EPDs.

## **EVALUATION INDEX AND SALE ORDER**

The evaluation index is the average of percentile rank for six EPD values (calving ease direct, weaning weight, yearling weight, maternal milk, marbling, and ribeye area), evaluation ADG and WDA (calculated independently for Senior and Junior bulls). Lower values generally indicate a more desireable average percentile ranking (milk is given no advantage when less than the 20<sup>th</sup> percentile). Sale order is determined by evaluation index, with the lowest indexing bull selling first. Evaluation index and sale order is located on the last page of the catalog.

## **EVALUATION INDEX FORMULA**

$$\frac{\text{CE\%} + \text{WW\%} + \text{YW\%} + \text{MM\%*} + \text{Marb\%} + \text{REA\%} + \text{ADG\%} + \text{WDA\%}}{8}$$

\*Maternal Milk EPD percentile is capped at 20%.

## **ACROSS BREED EPD ADJUSTMENTS**

Bulls of different breeds can be compared with the same EPD scale only after adding the specific adjustment factors to EPDs of the respective breeds.

Factors to add to EPDs to estimate across breed EPDs (2016)

**\$Value Indexes** are multi-trait selection indexes provided to simplify genetic selection decisions. \$Value Indexes estimate performance of the average future offspring of a sire compared to that of another sire, within the same breed. As with all natural service sires, it is recommended that bulls born between Feb 1, 2016 and March 31, 2016 have a complete BSE before being exposed to females.

## **BREEDING GUARANTEE**

All animals sold are guaranteed to be breeders, if properly cared for and not allowed to run with females until they are at least 15 months of age. Michigan State University, Michigan Cattlemen's Association, Plank Farm, United Producers Inc., or the Bull Evaluation Committee does not assume any liability for breeding guarantee. Any items not specifically mentioned will default to standard guarantee of the respective breed association.

## **CLAIMS FOR REFUND OR OTHER ADJUSTMENT**

All claims for adjustment or refund must be made in writing within 6 months of the sale or 3 months after the purchased animal reaches the age of 18 months, whichever occurs later. The return of the full purchase price will in any case be deemed full satisfaction and settlement.
